1. What Are the Kitchen Floor Plan Symbols

A kitchen floor plan is a schematic drawing that illustrates the arrangement of the cooking counter, sink, and kitchen appliances in the given space to develop an efficient layout. We use **kitchen floor plan symbols** to depict the details, elements, appliances, and other kitchen layout features in a 2D diagram. Making a kitchen floor plan looks simple at first, but after drawing, it gets complex because you have to leave space for people to move freely.

A kitchen floor plan aims to create a layout that allows you to prepare healthy meals easily and renovate the kitchen to make room for more appliances or furniture, such as a table with chairs. You can get **kitchen floor plan symbols** from EdrawMax and use them to create your drawing with a simple drag and drop.

Kitchen Floor Plan Symbols:

Kitchen floor plan symbols depict the details, elements, appliances, and other kitchen layout features in a 2D diagram. It divides the kitchen layout into three major components, the cooking range, the sink, and the refrigerator.

2. The Types of Kitchen Floor Plan Symbols

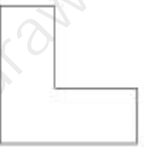

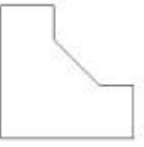

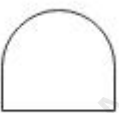

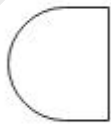

With **kitchen floor plan symbols**, you can easily depict a workable kitchen triangle. It divides the kitchen layout into three major components, the cooking range, the sink, and the

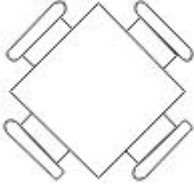

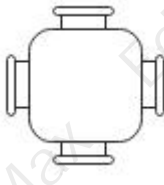

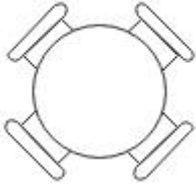

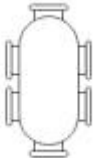

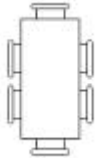

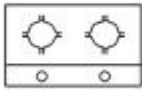

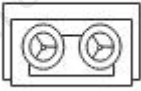

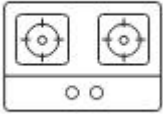

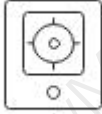

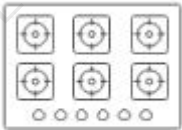

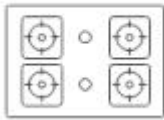

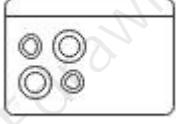

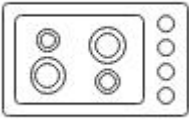

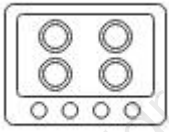

refrigerator. When arranging these three in the layout, you can easily add other elements such as the table and chairs, microwave oven and other appliances, and cabinets. You can customize the kitchen layout for a house, but for a restaurant, the layout must be efficient because it will affect productivity.

2.2 Wall Shell & Structure Symbols

These symbols are mainly used to depict the kitchen structure and specify the layout of each kitchen wall. These symbols create a 2D model that gives you an overview of the wall shell for your kitchen. Contractors use these symbols to specify the size and design of the kitchen. The purpose of using **wall shell symbols** is to outline the space where the owner could arrange the workable kitchen triangle and other furniture or appliances.

The most typical parts of a kitchen are walls. Exterior walls are represented by thicker lines, whereas internal walls are represented by thinner lines. There is sometimes no discernible difference between them. Instead of a single, solid line, outside walls can be represented by a black outline or double lines. 2.3 Doors and Windows Symbols

We use **door window symbols**³ to illustrate the position of windows and doors in the kitchen walls to create a fresh air flow in the kitchen and provide a comfortable environment. The goal is to add windows to leave a passage out for evacuation due to an emergency. The kitchen has the highest possibility of catching fire due to oils and gas. That's is why creating an escape route is essential. There are various window and doors symbols based on their shape and size.

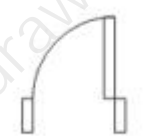

Doors resemble larger spaces between walls, with a curving line indicating which way the door will swing and providing clearance. Depending on their design and function, they may appear differently on floor plans.

The windows are portrayed as if they were part of the walls.

- Three parallel lines separate regular sliding-glass windows from solid walls.
- Casement windows have arcs that look like doors and demonstrate how they open outward.
- The bay windows are tilted like the edge of a stop sign, interrupting the wall's straight line trajectory.

2.4 Table & Chair Symbols

Table & chair symbols⁴ illustrate the position, shapes, and designs of various types of tables with chairs in the kitchen. These symbols include dining tables, coffee tables, side tables etc. A table fits perfectly in any house room, let alone the kitchen where you need it for eating breakfast. The chair design for the kitchen is mostly simply because you don't want to cover much space. Only add a table and chair in a big kitchen, or you might face difficulties moving freely.

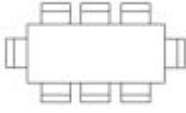

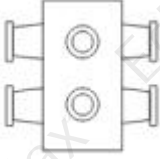

The table and chair are essential for any kitchen room or dining room. You can use these **kitchen floor plan symbols** to illustrate the arrangement of chairs, tables, and desks for the family in your home. With each type of panel and equipment, you need a table to place the electrical products and chairs where your families will sit and work for the day.

- Choose **"Union"**, **"Combine"**, **"Subtract"**, **"Fragment"**, **"Intersect"**, **"Smart Shape"** to make your symbols.

Step2: Create Kitchen Plan Symbols

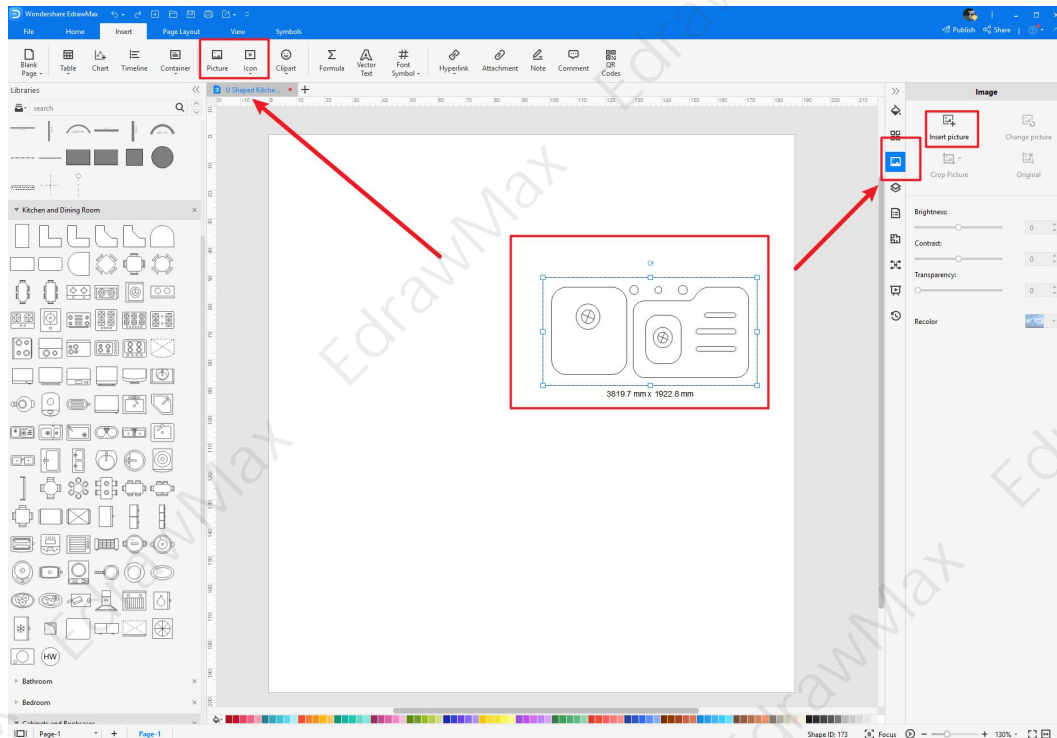

When you create a kitchen floor plan symbol, make sure that the size, design, and other attributes of your icon go along with other kitchen floor plan icons. Follow these steps to draw perfect symbols.

- Draw a tilted parallelogram shape to create an outline of the top of the table.
- Draw a wide V-shaped line with a short vertical line on both sides right underneath the outline.
- Draw an elongated, narrow figure right underneath the front left corner of the table.
- Repeat the previous step to draw another leg underneath the front right corner of the table.
- Draw another elongated, narrow figure with an angled bottom underneath the rear right corner of the table.

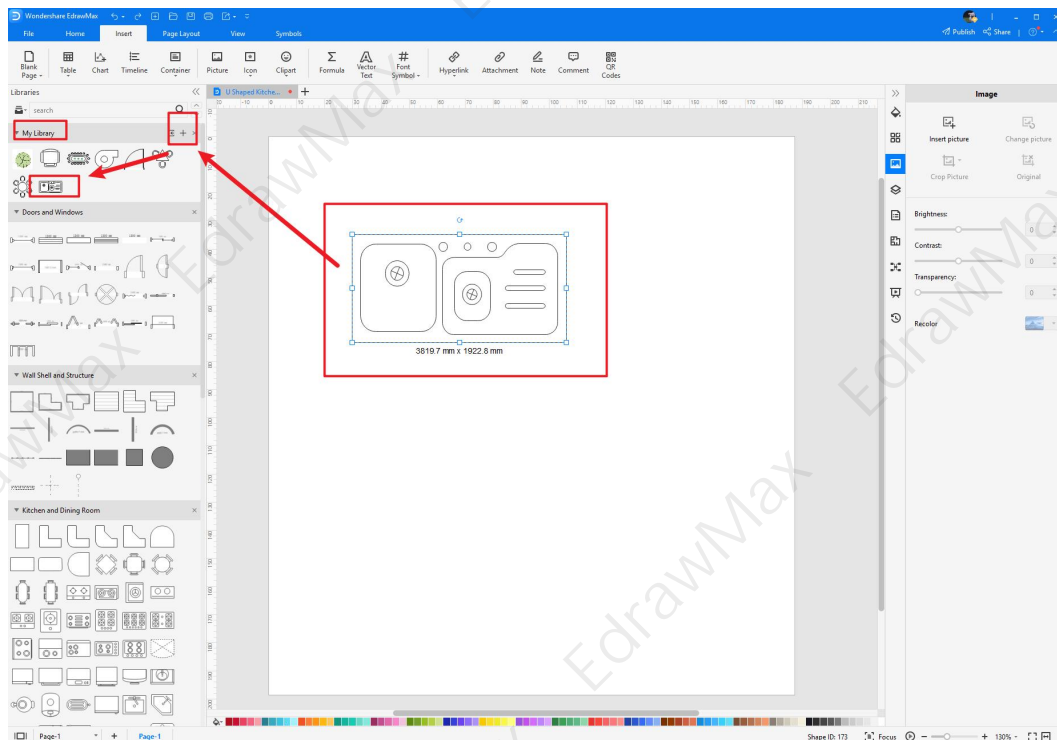

Step3: Import Kitchen Plan Symbols

Except for creating new kitchen floor plan symbols in EdrawMax, you can import kitchen floor plan symbols from your end. Find "**Insert**" on the top navigate toolbar, and import images to turn into symbols. Or click the third option of the right toolbar to insert images faster.
