Technical Support

## Data Privacy

Data privatization and isolation; data backup and disaster recovery; algorithm and key double insurance, data security and reliability.

## Powerful Collaboration

Support multi-person real-time online collaboration, meet the multi-scenario office needs of enterprises, and stimulate enterprise office potential.

## Advanced Customization

Ability to be equipped with an independent second-level domain name, allowing customization of the joint login of enterprise accounts, and automatically synchronize the internal account system of the enterprise.

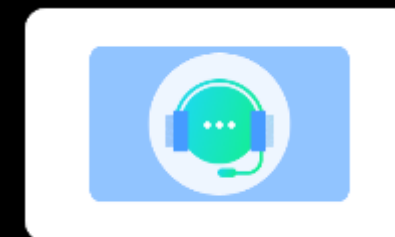

## Access Management

Provide enterprise-level user account system access, which can be authorized or released according to actual needs.

## Cost-Effective

Provides an authorized version, which can be flexibly configured regardless of the internal or external network.

## Personalized Service

Provide one-to-one exclusive business service, customer service consultation, and technical support.

## Flexible Deployment, Safe Management

### Private Cloud Deployment

The EdrawMind Online is deployed to the internal private cloud server of the enterprise, and the enterprise will have complete control over it. It is suitable for enterprises that require higher data security such as communications and finance.

### Public Cloud Deployment

The EdrawMind Online is independently deployed to the enterprise-exclusive AWS server, enjoying the functions and services of the public cloud, and at the same time having the advantage of resource isolation, which is suitable for most small and medium-sized enterprises.

### Support Sales Guarantee

Professional and prompt after-sales support service

### Customized to your Business Needs

Troubleshoots issues and respond to requests promptly as part of the company's personalized service

### Hassle-free Deployment

Professional support team to handle initial deployment issues to ensure seamless onboarding

### Employee Training Program

Employees undergo professional training and are equipped with skills to handle any scenarios, online or offline
